

KONE HydroMod™ DX

A NEW LEASE ON LIFE FOR YOUR BUILDING

Reliable operation can
reduce operating costs

Passenger safety can be
significantly improved

Smooth and quiet ride
enhances tenant satisfaction

A SMOOTHER RIDE IS A SAFER RIDE

Older hydraulic elevator systems may be at the end of their useful lifecycle and in need of a modernization.

Mechanical wear and tear, in addition to worn-out electrical components, can mean that your hydraulic elevator is frequently out of order. This is not only inconvenient for building users, it also increases maintenance costs.

KONE HydroMod™ DX can improve reliability and safety, and can reduce repair and maintenance costs. A modern elevator provides a smooth, quiet ride while meeting the latest safety and accessibility codes.

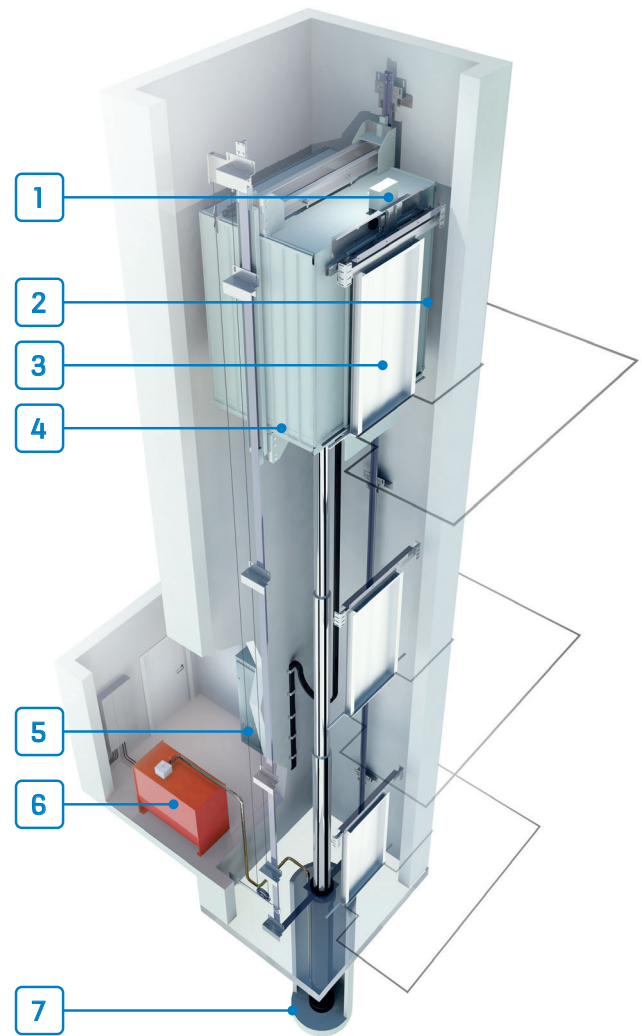

KONE HydroMod DX features the latest generation of elevator control technology and mechanical equipment. This combination provides the highest possible levels of ride comfort. Implementation of the KONE ReNova linear door technology provides smooth and reliable door operation. ADA-compliant signalization upgrades are standard features of KONE HydroMod DX solution.

Combining all these elements with a packaged cab interior upgrade makes KONE HydroMod DX a state-of-the-art hydraulic modernization offering.

FUTUREPROOF YOUR BUILDING WITH CONNECTIVITY

We have added connectivity to make the KONE HydroMod DX solution smarter to optimize people flow and enable increased operational efficiency.

Take advantage of KONE 24/7 Connected Services* – by connecting your elevators to the cloud and analyzing the data, we can identify maintenance needs and fix any potential problems before they cause breakdown.
